

Data Entry Form

One row per item · type this into the system in Phase 1

This form is the reason September's data survives. Every item is bound to one skill id below. Enter the option the student actually chose, not just whether it was right — the wrong option identifies the specific mistake, and that is the difference between "weak at algebra" and "multiplies before resolving the bracket".

Strand results from the marking sheet: Algebra ☐ Geometry & Trig ☐ Analysis ☐ Prob & Stats ☐ Combinatorics ☐

Item ids are stable. If the question sheet is regenerated the numbers may move but the ids will not, so enter by ID where the two disagree.
